Fishery Bulletin

Contents

Articles

- 738–745** **Aceves-Medina, Gerardo, Enrique A. González, and Ricardo J. Saldierna**
Larval development of *Symphurus williamsi*
(Cynoglossidae: Pleuronectiformes) from the Gulf of California
- 746–757** **Arreguín-Sanchez, Francisco, and Tony J. Pitcher**
Catchability estimates and their application to the red grouper
(*Epinephelus morio*) fishery of the Campeche Bank, Mexico
- 758–775** **Buckel, Jeffrey A., Michael J. Fogarty, and David O. Conover**
Foraging habits of bluefish, *Pomatomus saltatrix*, on the
U.S. east coast continental shelf
- 776–785** **Buckel, Jeffrey A., Michael J. Fogarty, and David O. Conover**
Mutual prey of fish and humans: a comparison of biomass consumed
by bluefish, *Pomatomus saltatrix*, with that harvested by fisheries
- 786–801** **Friedlander, Alan M., George W. Boehlert, Michael E. Field, Janet E. Mason, James V. Gardner, and Peter Dartnell**
Sidescan-sonar mapping of benthic trawl marks on the shelf and
slope off Eureka, California
- 802–811** **Gabr, Howaida R., Roger T. Hanlon, Salah G. El-Etreby, and Mahmoud H. Hanafy**
Reproductive versus somatic tissue growth during the life cycle of
the cuttlefish *Sepia pharaonis* Ehrenberg, 1831
- 812–827** **Gillanders, Bronwyn M., Douglas J. Ferrell, and Neil L. Andrew**
Aging methods for yellowtail kingfish, *Seriola lalandi*, and results
from age- and size-based growth models
- 828–841** **Hood, Peter B., and Andrea K. Johnson**
Age, growth, mortality, and reproduction of vermilion snapper,
Rhomboplites aurorubens, from the eastern Gulf of Mexico

- 842–861** **Hunt, Joseph J., Wayne T. Stobo, and Frank Almeida**
Movement of Atlantic cod, *Gadus morhua*, tagged in the Gulf of Maine area
- 861–872** **Ibañez Aguirre, Ana L., Manuel Gallardo-Cabello, and Xavier Chiappa Carrara**
Growth analysis of striped mullet, *Mugil cephalus*, and white mullet, *M. curema* (Pisces: Mugilidae), in the Gulf of Mexico
- 873–883** **Kaimmer, Stephen M.**
Direct observations on the hooking behavior of Pacific halibut, *Hippoglossus stenolepis*
- 884–890** **Lankford, Thomas E., Jr., Timothy E. Targett, and Patrick M. Gaffney**
Mitochondrial DNA analysis of population structure in the Atlantic croaker, *Micropogonias undulatus* (Perciformes: Sciaenidae)
- 891–899** **Massutí, Enric, Beatriz Morales-Nin, and Joan Moranta**
Otolith microstructure, age, and growth patterns of dolphin, *Coryphaena hippurus*, in the western Mediterranean
- 900–919** **Matkin, Craig O., Graeme Ellis, Peter Olesiuk, and Eva Saulitis**
Association patterns and inferred genealogies of resident killer whales, *Orcinus orca*, in Prince William Sound, Alaska
- 920–943** **Moser, H. Geoffrey, and Tilman Pommeranz**
Vertical distribution of eggs and larvae of northern anchovy, *Engraulis mordax*, and of the larvae of associated fishes at two sites in the Southern California Bight
- 944–953** **Natanson, Lisa J., John G. Casey, Nancy E. Kohler, and Tristram Colket IV**
Growth of the tiger shark, *Galeocerdo cuvier*, in the western North Atlantic based on tag returns and length frequencies; and a note on the effects of tagging
- 954–961** **Petrik, Rachel, Phillip S. Levin, Gregory W. Stunz, and John Malone**
Recruitment of Atlantic croaker, *Micropogonias undulatus*: Do postsettlement processes disrupt or reinforce initial patterns of settlement?
- 962–977** **Robards, Martin D., John F. Piatt, Arthur B. Kettle, and Alisa A. Abookire**
Temporal and geographic variation in fish communities of lower Cook Inlet, Alaska
- 978–986** **Simpfendorfer, Colin A.**
Mortality estimates and demographic analysis for the Australian sharpnose shark, *Rhizoprionodon taylori*, from northern Australia
- 987–998** **Smale, Malcolm J., and André J. J. Goosen**
Reproduction and feeding of spotted gully shark, *Triakis megalopterus*, off the Eastern Cape, South Africa
- 999–1016** **Stoner, Allan W., Allen J. Bejda, John P. Manderson, Beth A. Phelan, Linda L. Stehlik, and Jeffrey P. Pessutti**
Behavior of winter flounder, *Pseudopleuronectes americanus*, during the reproductive season: laboratory and field observations on spawning, feeding, and locomotion
- 1017–1024** **Urbán R., Jorge, Carlos Alvarez F., Mario Salinas Z., Jeff Jacobsen, Kenneth C. Balcomb III, Armando Jaramillo L., Paloma Ladrón de Guevara P., and Anelio Aguayo L.**
Population size of humpback whale, *Megaptera novaeangliae*, in waters off the Pacific coast of Mexico
- 1025–1030** **Vecchione, Michael**
Extraordinary abundance of squid paralarvae in the tropical eastern Pacific Ocean during El Niño of 1987
- 1031–1042** **Watson, William**
Early life history stages of the whitetip flyingfish, *Cheilopogon xenopterus* (Gilbert, 1890) (Pisces: Exocoetidae)

Notes

- 1043–1046** **Garlich-Miller, Joel L., and Douglas M. Burn**
Estimating the harvest of Pacific walrus, *Odobenus rosmarus divergens*, in Alaska
- 1047–1057** **Yang, Mei-Sun**
The trophic role of Atka mackerel, *Pleurogrammus monopterygius*, in the Aleutian Islands area
- 1058–1065** **Zeller, Dirk C.**
Ultrasonic telemetry: its application to coral reef fisheries research

The *Fishery Bulletin* (ISSN 0090-0656) is published quarterly by the Scientific Publications Office, National Marine Fisheries Service, NOAA, 7600 Sand Point Way NE, BIN C15700, Seattle, WA 98115-0070. Periodicals postage is paid at Seattle, WA, and at additional mailing offices. POSTMASTER: Send address changes for subscriptions to *Fishery Bulletin*, Superintendent of Documents, Attn.: Chief, Mail List Branch, Mail Stop SSOM, Washington, DC 20402-9373.

Although the contents of this publication have not been copyrighted and may be reprinted entirely, reference to source is appreciated.

The Secretary of Commerce has determined that the publication of this periodical is necessary according to law for the transaction of public business of this Department. Use of funds for printing of this periodical has been approved by the Director of the Office of Management and Budget.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Subscription price per year: \$50.00 domestic and \$62.50 foreign. Cost per single issue: \$19.00 domestic and \$23.76 foreign. **See back for order form.**

The *Fishery Bulletin* carries original research reports and technical notes on investigations in fishery science, engineering, and economics. It began as the Bulletin of the United States Fish Commission in 1881; it became the Bulletin of the Bureau of Fisheries in 1904 and the Fishery Bulletin of the Fish and Wildlife Service in 1941. Separates were issued as documents through volume 46; the last document was No. 1103. Beginning with volume 47 in 1931 and continuing through volume 62 in 1963, each separate appeared as a numbered bulletin. A new system began in 1963 with volume 63 in which papers are bound together in a single issue of the bulletin. Beginning with volume 70, number 1, January 1972, the *Fishery Bulletin* became a periodical, issued quarterly. In this form, it is available by subscription from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. It is also available free in limited numbers to libraries, research institutions, State and Federal agencies, and in exchange for other scientific publications.

Fishery Bulletin

Guide for Contributors

Content

Articles published in *Fishery Bulletin* describe original research in fishery marine science, engineering and economics, and the environmental and ecological sciences, including modeling. Articles may range from relatively short to extensive.

Notes are reports of 5 to 10 pages without an abstract and describing methods or results not supported by a large body of data.

Although all contributions are subject to peer review, responsibility for the contents of papers rests upon the authors and not upon the editor or the publisher. It is therefore important that the contents of the manuscript are carefully considered by the authors.

Submission of an article is understood to imply that the article is original and is not being considered for publication elsewhere. Manuscripts should be written in English. Authors whose native language is not English are strongly advised to have their manuscripts checked by English-speaking colleagues prior to submission.

Preparation

Title page should include authors' full names and mailing addresses, the corresponding author's telephone, FAX number, and e-mail address, and a list of key words to describe the contents of the manuscript.

Abstract should not exceed one double-spaced typed page. It should state the main scope of the research but emphasize its conclusions and relevant findings. Because abstracts are circulated by abstracting agencies, it is important that they represent the research clearly and concisely.

Text must be typed double-spaced throughout. A brief introduction should portray the broad significance of the paper; the remainder of the paper should be divided into the following sections: **Materials and methods**, **Results**, **Discussion** (or **Conclusions**), and **Acknowledgments**. Headings within each section must be short, reflect a logical sequence, and follow the rules of multiple subdivision (i.e. there can be no subdivision without at least two

items). The entire text should be intelligible to interdisciplinary readers; therefore, all acronyms, abbreviations, and technical terms should be spelled out the first time they are mentioned. The scientific names of species must be written out the first time they are mentioned; subsequent mention of scientific names may be abbreviated. Follow *Scientific Style and Format: the CBE Manual for Authors, Editors, and Publishers* (6th ed.), for editorial style, and the most current issue of the American Fisheries Society's *Common and Scientific Names of Fishes from the United States and Canada*, for fish nomenclature. Dates should be written as follows: 11 November 1991. Measurements should be expressed in metric units, e.g. metric tons as t; if other units of measurement are used, please make this fact explicit to the reader. The numeral one (1) should be typed as a one, not as a lower-case el (l). Use of appendices is discouraged.

Text footnotes should be numbered with Arabic numerals and inserted at the bottom of text. Footnote all personal communications, unpublished data, and unpublished manuscripts with full address of the communicator or author, or, as in the case of unpublished data, where the data are on file. Authors are advised to avoid references to nonstandard (gray) literature, such as internal, project, processed, or administrative reports. Where these references are used, please include whether they are available from NTIS (National Technical Information Service) or from some other public depository.

Literature cited comprises published works and those accepted for publication in peer reviewed literature (in press). Follow the name and year system for citation format. In the text, cite as follows: Smith and Jones (1977) or (Smith and Jones, 1977). If there is a sequence of citations, list alphabetically by author(s): Smith, 1987; Smith and Jones, 1985; Smith and Peterson, 1986. Abbreviations of serials should conform to abbreviations given in *Serial Sources for the BIOSIS Previews Database*. Authors are responsible for the accuracy and completeness of all citations.

Tables should not be excessive in size and must be cited in numerical order in the

text. Headings within tables should be short but ample enough to allow the table to be intelligible on its own. All unusual symbols must be explained in the table legend. Other incidental comments may be footnoted with italic numerals. Use the asterisk only to indicate probability in statistical data. Zeros should precede all decimal points for values less than one.

Figures must be cited in numerical order in the text. The senior author's last name and the figure number should be written on the back of each one. Hand-drawn illustrations should be submitted as originals and not as photocopies. Submit photographs as glossy prints or slides with good contrast, otherwise we cannot guarantee a good final printed copy. Graphs should be submitted as laser-printed copies, not as photocopies. Label all figures with Helvetica typeface and capitalize the first letter of the first word in axis labels. Italicize species name and variables in equations. Use zeros before all decimal points. Use uppercase Times Roman bold typeface to label the parts of a figure, e.g. A, B, C, etc. Each figure legend should explain all symbols and abbreviations in the figure and should be double-spaced and placed at the end of the manuscript.

Copyright law Government publications are not copyrighted; they fall within the public domain. If an author reproduces any part of a government publication in his work, reference to source is appreciated.

Submission

Send printed copies (original and three copies without staples) to the Scientific Editor:

Dr. John V. Merriner
Southeast Fisheries Science Center
National Marine Fisheries Service
101 Pivers Island Road
Beaufort, NC 28516

Once the manuscript has been accepted for publication, you will be asked to submit an electronic copy of your manuscript to the Managing Editor. The electronic copy should be submitted in *WordPerfect* or *Microsoft Word* text format and placed on a 3.5-inch disk that is double-sided, double or high density, and that is compatible with either DOS or Macintosh systems.

A copy of page proofs will be sent to the author for final approval prior to publication.

Reprints (copies of published articles and notes) are available free of charge to the senior author (50 copies) and to his or her laboratory (50 copies). Additional copies may be purchased in lots of 100 when the author receives page proofs.

This statement is required by the Act of August 12, 1970, Section 3685, Title 39, U.S. Code, showing ownership, management, and circulation of the *Fishery Bulletin*, publication number 366-370, and was filed on 15 September, 1999. The *Bulletin* is published quarterly (four issues annually) with an annual subscription price of \$50.00 (sold by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402). The complete mailing address of the office of publication is: NMFS Scientific Publications Office, NOAA, 7600 Sand Point Way NE, BIN C15700, Seattle, WA 98115. The complete mailing address of the headquarters of the publishing agency is: National Marine Fisheries Service, NOAA, Department of Commerce, 1335 East-West Highway, Silver Spring, MD 20910. The name of the publisher is Willis Hobart and the managing editor is Sharyn Matriotti; their mailing address is: NMFS Scientific Publications Office, 7600 Sand Point Way NE, BIN 15700, Seattle, WA 98115.

The owner is the U.S. Department of Commerce, 14th St. N.W., Washington, DC 20230; there are no bondholders, mortgages, or other security holders. The purpose, function, and nonprofit status of the organization (agency) and the exempt status for Federal income tax purposes has not changed during the preceding 12 months. The extent and nature of circulation is as follows: Total number of copies (A) (average number of copies of each issue during the preceding 12 months) was 1,958 and the actual number of copies of the single issue published nearest to the filing date was 1,958. Paid circulation (B) is handled by the U.S. Government Printing Office, Washington, DC 20402, and the total number printed for their sales (mail subscriptions and individual sales) was 525 for both the average number of copies each issue during the preceding 12 months and the actual number of copies of the single issue published nearest to the filing date. Free distribution (D) by mail; samples, complimentary and

other free copies (average number of copies each issue during the preceding 12 months) was 0 and the actual number of copies of the single issue published nearest to the filing date was 0. Free distribution outside the mail (E) by carriers or other means was 0 for both average number of copies and actual number of copies. Total free distribution (F) was 0 for both average number of copies and actual number of copies of the single issue published nearest the filing date. The total distribution (G: sum of C and G) (average number of copies each issue during the preceding 12 months) was 1,958 and the actual number of copies of the single issue published nearest to the filing date was 1,958. There were no copies not distributed or returned from news agents (H). The total (I: sum of G and H) is equal to the net press run figures shown in Item A: 1,958 and 1,958 copies, respectively. I certify that the statements made by me above are correct and complete: (Signed) Willis Hobart, Publisher.
